Summary

Proven ability to **sell, build, and present** customer-facing technical solutions across e-commerce, AI, and web technology. Software engineering and business background with results including **\$100K+** in sales, **\$25K+** in ad spend managed, **10+** website clients closed, and technical teams led from discovery through executive presentation.

Work Experience

ComfyWon / [ShopComfyWon.com](#) | Founder, E-Commerce & Technical Solutions Lead

Sep 2025 – May 2026 | Queens, NY

- Built and scaled a DTC e-commerce brand to **\$100,000+** in sales and **1,000+** products sold through product positioning, paid ads, and conversion-focused messaging.
- Managed **\$25,000+** in ad spend across Meta campaigns, UGC video, image ads, keyword campaigns, and product-angle experiments.
- Researched competitors, customer pain points, and product gaps to position the brand against larger wellness products.
- Built [ShopComfyWon.com](#) using React and Python, focusing on customer experience and website flow that creates high sale conversions.

Research Foundation (\$580M+ in assets) | Software team lead Intern

Jul 2024 – Sep 2024 | Queens, NY

- Led a team through discovery, solution design, development, testing, and presentations for an **AI/RAG system** to managers and executives.
- Presented technical progress and business value to managers, showing improvement in AI project consistency from **80% to 98%**.
- Implemented secure access controls, data handling practices, and testing workflows to protect company information and ensure reliable AI system performance.
- Communicated the project technical and business value to company executives, contributing to IBM recognition for potential enterprise marketplace adoption.

Freelance Web Solutions Consultant | Web Developer & Sales Consultant

Dec 2024 - Jul 2025 | Queens, NY

- Increased client lead conversions by **40–70%** through optimized website flow, stronger calls-to-action, and conversion-focused design.
- Recommended digital growth strategies that contributed to estimated client revenue increases of **20–45%** post-launch.
- Helped businesses improve online customer engagement by **50%+** through mobile optimization, lead-capture systems, and trust-focused website messaging.

Queens College Tech Incubator | Sales Engineer Intern

Oct 2022 - Jul 2023 | Queens, NY

- Led an intern team in building an AI chatbot that increased user engagement by **35%** and reduced support response time by **40%**.
- Presented product updates to managers and explained how search improvements helped users find information **50% faster**.
- Managed planning, execution, testing, and debugging across the project lifecycle.
- Earned a return offer for leadership, communication, and technical delivery.

Projects and Achievements

AI Career Coach | (Best AI project Cuny Hackathon 2024) | (Python, Flask, React, Milvus)

- Pitched and built a SaaS-style AI platform that matched resumes, GitHub profiles, and LinkedIn data to job opportunities.
- Led product concept, technical build, and final pitch, translating AI functionality into a clear business use case.
- Pitched the AI platform to engineers and researchers from **Google, Bloomberg, and JPMorgan**, clearly communicating its competitive advantages over existing solutions and winning **Best AI Project** at the CUNY Hackathon 2024.

Code for All (Queens College Coding Club) | Software Developer, Tutor & Event Leader

- Work with a team to develop the club website for **2000+** members to use.
- Hosted multiple technical events on APIs, AI, Security, software careers, and project development.
- Explained technical concepts to students in simple, practical terms to improve understanding and engagement.
- Coached students through complex technical topics by breaking down problems, asking discovery-style questions, and adapting explanations to different skill levels.
